

BUILTRITE x ALTOP

STRATEGIC MANUFACTURING & SUPPLY ALLIANCE

A formal alliance combining engineering, system development, manufacturing, fabrication and supply capabilities for Canada, the United States, the Dominican Republic and the Caribbean.

A Broader Platform of Building-Envelope Solutions

BuiltRite and Beijing ALTOP each bring extensive portfolios of proprietary and patented facade, curtain wall, window, door and architectural aluminum systems developed independently over many years. Through this alliance, the companies will work closely together while remaining independent organizations and retaining ownership of their respective technologies and intellectual property.

Collaborative System Development

The alliance also establishes a framework for BuiltRite and ALTOP to collaboratively develop new systems tailored to the Canadian, U.S. and Caribbean markets. Engineering teams will work together on drawings, technical coordination, system development and future product solutions.

Dominican Republic Manufacturing & Logistics Hub

BuiltRite World's manufacturing operation in the Dominican Republic will play a key role in the strategy as a fabrication, assembly and logistics hub connecting Asian manufacturing capabilities with projects and customers throughout the Western Hemisphere.

Design together. Develop together. Manufacture globally. Deliver locally.

More systems. More capabilities. More innovation.
